

Do you have a design service?

Our experienced and qualified sign makers can offer a design service for you if you should require. We can produce a design based on just your company logo, or work with your own designs, whichever is more suitable. We also produce and install all our own signage, making the process as streamline as possible.

Should I have a budget in mind?

Yes - We have an extensive product range to suit all budgets and requirements. Our process can include various elements which when put together create the perfect signage solution for you. We are experts in signs and graphics and work hard to make sure we provide you with the best possible solution. By having a budget, we can tailor our solutions to your expectations – which gives you control over your project and allows us, as your sign maker, to produce the best possible work for you, within your budget limits.

Vehicle Wrapping - Colour Change 'Wrap' - Digitally Printed 'Wrap' – Partial Wrap - Cut Vinyl Graphics' - What is the difference?

Vehicle wrapping by Signs Express is a form of print advertising where a vehicle can be completely covered in full coloured images. Previously, this could only be done by hand painting the vehicles. Today, however, vehicle wrapping is achieved using large sheets of printed vinyl that can be easily applied and removed from all vehicle surfaces. Vehicle wrapping enables you to use full colour photos or your company artwork to produce eye-catching results which helps attract more clients and strengthen your company brand.

Vehicle wrapping can be produced using either a solid colour, which will last up to 10 years or by full colour digital printing which will last up to 5 years. At Signs Express we only use the top of the range 3M vehicle wrapping materials which means you get a warranty, peace of mind and a matching protective over-laminate. Our vehicle wrapping materials, unlike inferior products on the market, will remove cleanly meaning there is less cost involved in returning your vehicle to its original colour.

A partial wrap, for example across the back doors and sides of the vehicle. There are lots of different ways we can create a great looking livery for you and work within your budget.

Signs Express apply lots of vehicle liveries using coloured Cut Vinyl Graphics to great effect. Fantastic designs and images can be achieved using several different coloured vinyl's. Although not always as eye-catching as the more recent vehicle wrapping the cut vinyl option is still a popular choice.

The foundation of modern sign-making, computer driven cut vinyl allows the production of combined coloured graphics and text in hundreds of colours of self-adhesive vinyl (including metallic and reflective materials). One advantage over printed vinyl is that these products can last up to 8 years depending on your requirements.

Signs Express can design liveries for most vehicles as we have design templates for every type of van, car, truck and coach ready for you to use.
